

How-To Add a Proxy in PowerChart for Providers/Staff members Without Having to Accept Proxy

(This allows selected staff members to view your Inbox while you're on TDY, Leave, or Sick)

Disclaimer: Depending on the end users role, access level or the amount of information viewable will vary.

Example: Providers can access another provider's proxy as well as a technician's proxy and can view everything. Technicians can access another technician's proxy and view everything, but when a technician views a provider's proxy, they are limited.

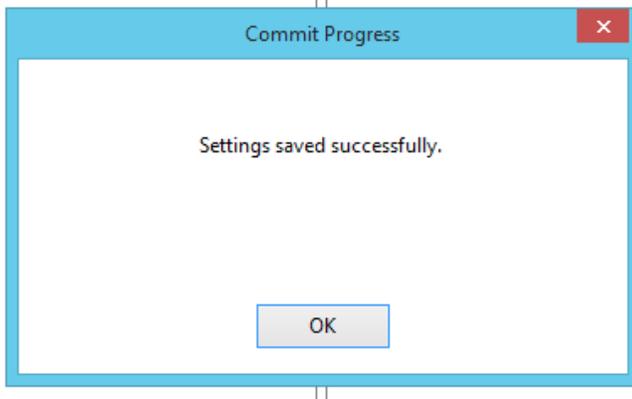

1. Open PowerChart
2. Under your PowerChart Organizer (On the Main Homepage) select  (Next to inbox tab)
3. Select 
4. Select  (at the bottom under "Proxies Taken from Me")
5. Under "Allow Proxy to be Taken From": Type in the Last name, First name of the provider/staff member whose box you want to view.

Example:

User
 

6. Select Enter or 
7. Under "Allow Proxy to be Taken By": type in your name or the provider/staff member who will needs to view the box.
8. Be sure to Select  after.
9. **Repeat steps 7-8 if you are adding multiple staff members**

10. Select 
11. Select 
12. Select 
13. This pop-up will appear and select OK

To View the Inbox of the Provider/Staff Member you were Proxied to:

1. Open PowerChart
2. Under your PowerChart organizer(main home page) select  (Next to inbox tab)
3. Select 
4. At the bottom left hand side select "Received" 
5. Select 
6. Under "User": Select  and select the Provider/Staff Member's Name to which you want to be proxied to.

- Under "End Date", change the date to a future date.
Example: from 2018 to 2028

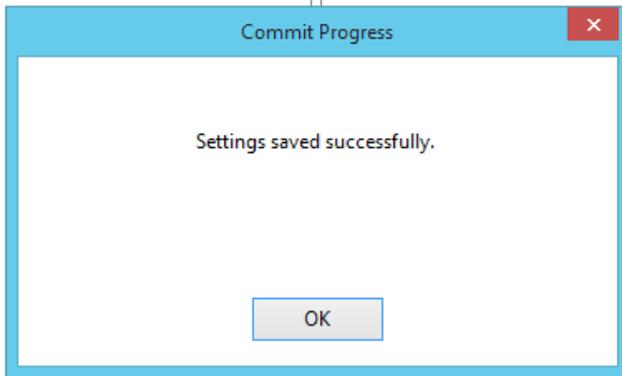

End Date

- Select

- Select

- Select

- This pop-up will appear and select OK

You will now be able to find the added proxy Provider/Staff Member under your Proxies box
